RESUMÉ

Marco Angelo P. Quanico
Software Developer | Fresh Graduate
4+ years building personal and academic projects · 10 months industry experience
marcoangelo.quanico@gmail.com 09218692170
9 units MS in Computer Science

Summary

Fresh Computer Science graduate with approximately **10 months of professional industry experience in healthcare IT systems**. Passionate about software development since college, with **4+ years of self-driven projects spanning full-stack web, mobile, and systems development**. Seeking a junior to mid-level role where hands-on industry experience can grow further.

EDUCATION

- **UNO – Recoletos Inc.:** Master of Science in Computer Science
  - → 9 units
  - → In Progress
- **STI West Negros University:** Bachelor of Science in Computer Science
  - → A.Y. 2021-25
  - → Best in Thesis A.Y. 2025
    - ❖ Determining Seashell Abundance through Image Processing
- **La Consolation College Bacolod:** Senior Highschool STEM
  - → A.Y. 2019-21
- **Evangelical Christian Montessori School:** Junior Highschool
  - → A.Y. 2015-19
- **La Consolation College Bacolod:** Elementary
  - → A.Y. 2010-15

INDUSTRY EXPERIENCE

- **Riverside Medical Center Inc. | Practicum / OJT · March 2025 – June 2025**
  - → Assigned to design and develop institution's doctor directory with a given specifications and UI inspiration
  - → 85% UX satisfaction feedback from Institution's Software Engineer and Developer with minor feedback on database schema
- **Adventist Medical Center Bacolod | IT Staff (Probationary) · June 2025 – January 2026**
  - → Led maintenance and continuous improvement of a custom-built HR information system, ensuring high availability and resolving production issues efficiently. Cleared backlogs of to-do fixes of the application by 60%
  - → Worked closely with HR stakeholders to translate operational requirements into system enhancements, improving process efficiency and user adoption

- → Architected and implemented a shift scheduling module with swap and approval workflows, reducing manual scheduling overhead and improving internal coordination
- → Participated on hospital-wide research

PROJECTS

- **Medical Arts Platform:** React + Laravel + Monitoring Automation (Grafana) + Queue Jobs + Schedule Jobs + Email system + Ubuntu + Node + RESTful API + Cloudflare R2 Bucket + Git (Doctor dynamic scheduling + Directory + Notification + Clinic Role Management)
  - → Role: Software Developer
- **Hospital HR System**: ASP.NET C# Winforms + MSSQL (Shift scheduling & approval workflow)
  - → Role: System Developer
- **Doctor Directory**: PHP blade + Laravel + PostgreSQL (Full CRUD + search functionality)
  - → Role: Software Developer
- **Seashell Counting and Logging Application:** Kotlin (Java) + YOLOv8 model + JSON data structure (Seashell classification and counting + Logging)
  - → Role: Software Developer
- **Disease Directory web-scrapping tool:** Python
  - → Role: Software Developer

SKILLS

- *Technical Skills*
  - → RESTful API Design, Cross-Technology Flexibility, Queue & Schedule Jobs, UI/UX Design, Data Schema Engineering, Automated Testing, Edge-case Testing, CI/CD, AWS, Modern Tech Stack Adaptability
- *Soft Skills*
  - → Research, Troubleshooting, Risk Management, Project Management, Organizational skills, Documentation skills, Requirements gathering, Attention to detail
